Educational Background

Master of Information Technology (Flinders University, Adelaide)   **07/2022 – 06/2024**

Achievement:

- GPA 6.93/7
- Chancellor's Letter of Commendation

Key Skills Summary

- **Design Tools:** Figma, Photoshop
- **Front-End Development:** JavaScript (React, Redux, React Router), TypeScript, Next.js, Tailwind CSS, HTML, CSS
- **Back-End Development:** Node.js
- **Databases & CMS:** MySQL, MongoDB, Sanity CMS
- **Tools:** GitHub, VS Code, Insomnia, Postman, Jira, MongoDB Compass

Experience:

Ailurotech Solutions, Adelaide   **07/2024-10/2024**
Web Developer

As a Web Developer Intern, I helped build responsive web applications using Next.js, TypeScript, Tailwind CSS, Chakra UI, and Sanity CMS. I developed reusable UI components, integrated Sanity CMS for real-time product management, and collaborated with an Agile team using Git, GitHub, Jira, and Insomnia for API testing.

Projects:

- Eutopia Perfume E-commerce(https://eutopiaperfumes.com.au/):

Built with **Next.js** and **TypeScript**, this project leverages **Sanity.io** for content management and integrates **Shopify** to streamline product handling, orders, and payments. Tailwind CSS and Chakra UI deliver a responsive interface, improved product management, and a smoother shopping experience.

YNW Web and Apps, Adelaide   **03/2025-current**
Web Developer

Customized a Clapat template using HTML, CSS, JavaScript, and jQuery to build the company's official website. Responsible for modifying UI layouts, updating text and design elements, selecting imagery, and assisting with visual design to align with brand identity.

Projects:

Blotz – Intelligent To-Do List App (https://blotz-task-app.vercel.app/)
Tech Stack: Built a responsive UI using React and Next.js, with complex form handling powered by React Hook Form. Developed backend APIs and real-time collaboration using .NET Core and SignalR, with data managed via EF Core and SQL Server. Integrated Azure AI services (OpenAI, Speech) to enable advanced task analysis and intelligent suggestions.
An intelligent task management platform with planned AI features such as PDF task extraction and smart priority recommendations.

E-commerce (https://next-commerce-alice.vercel.app/)
Built with Next.js App Router, leveraging React Server Components and Server Actions to enhance performance and maintainability.
Integrated Shopify as a headless CMS to implement product management, inventory, cart, product detail pages, and category filtering features. Designed a responsive interface using Tailwind CSS and Headless UI to optimize user experience.

Recipe Sharing Platform (https://veggify-fronted-app.vercel.app/)
Users can browse, search, and view recipes from different categories along with their detailed information.
Tech Stack: React, Tailwind CSS, Node.js, MongoDB
Interacts with the backend API via Axios, supporting search by category and keywords, and ensuring a responsive design. The backend is built with Node.js and MongoDB to create a RESTful API that handles recipe and category data.
